(2019/06 - 2020/02)

- Provided great customer service
- Worked with minimal supervision
- Communicated with staff
- Documented daily activity

VOLUNTEER EXPERIENCE

WordPress Developer / H.R Mental Wellness Centre, Vancouver BC

(2020/05 - current)

The H.R Mental Wellness Centre integrates spirituality in its programs to help treat anxiety and depression. I volunteered to remake the center's WordPress website in order to better attract visitors. I use HTML, CSS, JavaScript and PHP to customize an existing WordPress theme to best suit the needs of the center.

Frontend Developer / Brickhouse Ventures, Vancouver BC

(2020/04 - 2020/05)

Brickhouse Ventures is a venture capital startup company that needed a website to represent their business. I teamed up with one of my classmates to build the website with React.js and TypeScript, integrating Netlify's CMS to allow the website to be edited without writing code. Links to the website are currently available on request.
