

Vladyslav Vekslyer

Hard-working, full-stack developer passionate about improving skills at any chance.
Biggest selling point is attitude: if a job is worth doing, it's worth doing well.
Part of the team that won 1st place on the 2019 VanHacks Hackathon for Social Good.
Looking to build a strong and long-term relationship with a tech company.

Cornerstone Community College, Vancouver
(2019/04 - 2020/04)

Web Developer Bootcamp

Udemy, Colt Steele
(2018/10 - 2019/05)

PROJECTS

BC Charity Portal: full-stack web application

(jQuery, Express + Node, MongoDB, JavaScript)

BC Charity Portal aims to streamline any research that potential donors want to do before donating to an NPO. This is done by gathering all NPOs operating in BC unto a single, easily-accessible platform where donors can communicate with each other and the NPOs have control over the content they present.

The Crows: full-stack web application

(React, TypeScript, MySQL, Express + Node, Docker)

The Crows blends in narrative-driven text games together with card games to deliver a game that provides you with a unique story-telling experience each time you play. With an intuitive design, you can quickly start playing it! Simply read the current story and play a card to respond to the circumstances presented to you.

Go Doggy: full-stack mobile application

(React Native, Express.js, MongoDB, Node.js)

The app that won the VanHacks 2019 hackathon!

Go Doggy aims to make it easier for people to volunteer to take sheltered dogs on walks as well as act as a platform to showcase the dogs that need to be adopted.

My role in the team was implementing the backend and scheduling view.

Demo available in-person | [Github Repository](#)
